

Condensed Interim Consolidated Financial Statements

For the Nine Months Ended June 30, 2012

(Expressed in Canadian Dollars)

(Unaudited – Prepared by Management)

NOTICE OF NO AUDITOR REVIEW OF CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

In accordance with National Instrument 51-102, Colombia Crest Gold Corp. discloses that the accompanying unaudited condensed interim consolidated financial statements for the nine months ended, June 30, 2012, were prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these condensed interim consolidated financial statements.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The unaudited condensed interim consolidated financial statements of Colombia Crest Gold Corp. (the "Company") are the responsibility of the Company's management and they have been prepared by management in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board. These unaudited condensed interim consolidated financial statements do not include all of the disclosures required for annual financial statements. Management acknowledges responsibility for the preparation and presentation of these unaudited condensed interim consolidated financial statements, including responsibility for significant accounting judgements and estimates and the choice of accounting principles and methods that are appropriate to the Company's circumstances. In the opinion of management, these unaudited condensed interim consolidated financial statements have been prepared within acceptable limits of materiality and are in accordance with International Accounting Standard 34, Interim Financial Reporting using accounting policies consistent with IFRS appropriate in the circumstances.

Management has established processes, which are in place to provide it sufficient knowledge to support management representations that it has exercised reasonable diligence, that (i) the unaudited condensed interim consolidated financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of, and for the periods presented by, the unaudited condensed interim consolidated financial statements and (ii) the unaudited condensed interim consolidated financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date of, and for the period presented by, the unaudited condensed interim consolidated financial statements.

The Board of Directors is responsible for reviewing and approving the consolidated financial statements and for ensuring that management fulfills its financial reporting responsibilities. An Audit Committee, which is comprised of non-management directors, assists the Board of Directors in fulfilling this responsibility. The Audit Committee meets with management to review the internal controls over the financial reporting process, the consolidated financial statements and the auditors' report. The Audit Committee also reviews the Company's Management's Discussion and Analysis to ensure that the financial information reported therein is consistent with the information presented in the consolidated financial statements. The Audit Committee reports its findings to the Board of Directors for its consideration in approving the consolidated financial statements for issuance to the shareholders.

Management recognizes its responsibility for conducting the Company's affairs in compliance with established financial standards, and applicable laws and regulations, and for maintaining proper standards of conduct for its activities.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

1. Nature of Operations and Going Concern

The Company was incorporated under the laws of the Province of British Columbia on January 20, 1981 and its common shares are listed for trading on the TSX Venture Exchange (“TSXV”).

The Company is in the development stage and is in the process of exploring and developing its resource properties in Bolivia and Columbia and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of amounts shown for resource properties and related deferred exploration expenditures is dependent upon the discovery of economically recoverable reserves, confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development of the resource properties and upon future profitable production or proceeds from the disposition thereof.

Management has estimated that the Company will have adequate funds from existing working capital to meet corporate, development, administrative and property obligations for the coming year. As at June 30, 2012, the Company had \$3,461,229 in cash and cash equivalents, working capital of \$3,423,746 and no long-term debt.

The Company will require additional financing from time to time, and while the Company has been successful in raising equity financing through the issuance of common shares in the past, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be available on acceptable terms.

2. Significant Accounting Policies

Statement of compliance and conversion to International Financial Reporting Standards

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34, Interim Financial Reporting (“IAS 34”) using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”). Accordingly, these unaudited condensed interim consolidated financial statements do not include all of the information and footnotes required by IFRS for complete financial statements for year end reporting purposes.

These are the Company’s first IFRS condensed interim consolidated financial statements for part of the period covered by the first IFRS consolidated annual financial statements to be presented in accordance with IFRS for the year ended September 30, 2012. Previously the Company prepared its consolidated annual and consolidated interim financial statements in accordance with Canadian Generally Accepted Accounting Principles (“GAAP”).

The preparation of these condensed interim consolidated financial statements resulted in changes to the accounting policies as compared to the most recent annual financial statements prepared under Canadian GAAP. The accounting policies set out below have been applied consistently to all periods presented in these interim consolidated financial statements. They also have been used in preparing an opening IFRS balance sheet at October 1, 2010 for the purposes of the transition to IFRS, as required by IFRS 1, “First Time Adoption of International Financial Reporting Standards (IFRS 1)”. The impact of the transition from Canadian GAAP to IFRS is explained in Note 12.

The unaudited condensed interim consolidated financial statements were authorized for issue by the Board of Directors on August 24, 2012.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

2. Significant Accounting Policies – (cont'd)

Basis of Presentation

These unaudited condensed interim consolidated financial statements have been prepared on a historical cost basis, as modified by the revaluation of certain derivative financial instruments, and have been prepared using the accrual basis of accounting. The preparation of interim financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of the policies and reported amounts of assets and liabilities, revenue and expenses. Actual results may differ from these estimates.

Areas requiring a significant degree of estimation relate to the determination of the useful lives of property and equipment, the recoverability of the carrying value of exploration and evaluation assets, fair value measurements for financial instruments and stock-based compensation and other equity-based payments, the recognition and valuation of provisions for restoration and environmental liabilities, and the recoverability and measurement of deferred tax assets and liabilities.

Basis of Consolidation

The consolidated financial statements include all subsidiaries of the Company. Subsidiaries are entities over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. They are de-consolidated from the date that control by the Company ceases. All significant inter-company transactions and balances have been eliminated.

These consolidated financial statements include the accounts of Colombia Crest Gold Corp. and its wholly owned subsidiaries Eaglecrest Exploration Bolivia SA (“EEB”), a company incorporated in Bolivia, Eaglecrest Explorations Panama Corp. (“EEP”), a company incorporated in Panama City, Panama, and EEP’s wholly owned subsidiary, Colombiana de Oro SA (Colombiana”), a company incorporated in Panama City, Panama, as well as the branch office operations of Colombiana.

Foreign Currency Translation

The Company’s functional and reporting currency is the Canadian dollar. The functional currency of EEB is the US dollar and the Colombian peso for the branch office operations of Colombiana. EEP and Colombiana are holding companies with no other operations or activities. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, The Effects of Changes in Foreign Exchange Rates.

Exchange rates published by the Bank of Canada were used to translate the subsidiaries and the Colombia branch’s financial statements into the Canadian dollar in accordance with IAS 21, The Effects of Changes in Foreign Exchange Rates. This standard requires that assets and liabilities be translated using the exchange rate at period end, and income, expenses and cash flow items are translated using the rate that approximates the exchange rates at the dates of the transactions (i.e. the average rate for the period). The foreign exchange differences on translation of the Colombian branch are recognized in other comprehensive loss.

Foreign currency transactions are translated into the relevant functional currency of each entity using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of unsettled monetary assets and liabilities denominated in foreign currencies are recognized in net income.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

2. Significant Accounting Policies – (cont'd)

Financial Instruments

Financial Assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held-to-maturity, available-for-sale, loans-and receivables or at fair value through profit or loss (“FVTPL”). Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through earnings. FVTPL has two categories: designated and held for trading. The Company’s cash and short-term money market investments are classified as FVTPL.

Financial assets classified as loans-and-receivables and held-to-maturity are measured at amortized cost. The Company’s trade and other receivables are classified as loans-and receivables. Financial assets classified as available-for-sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) except for losses in value that are considered other than temporary.

Transactions costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset. The Company does not have any derivative financial assets.

Financial Liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities. Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. The Company’s trade and other payables are classified as other-financial-liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives such as those relating to warrants denominated in a foreign currency are also classified as FVTPL unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized through the statement of comprehensive income.

Impairment of Financial Assets

Financial assets are assessed for indicators of impairment at each financial position reporting date. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted. For unlisted shares classified as available for sale (“AFS”), a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organization.

For certain categories of financial assets, such as amounts receivable and assets that are assessed not to be impaired indirectly are subsequently assessed for impairment on a collective basis. The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of amounts receivable, where the carrying amount is reduced through the use of an allowance account. When an amount receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

2. Significant Accounting Policies – (cont'd)

Impairment of Financial Assets – (cont'd)

With the exception of AFS equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit and loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized. In respect of AFS equity securities, impairment losses previously recognized through profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized directly in equity.

Exploration and Evaluation Assets and Expenditures

Currently, all mineral properties of the Company are at exploration stage. Pre-exploration costs are expensed in the period in which they are incurred.

The Company records its interests in mineral properties at cost. Exploration expenditures relating to these interests are capitalized until the properties to which they relate are placed into production, sold or abandoned. These expenditures will be amortized over the estimated useful life of the related property using the unit-of-production basis following commencement of production, or written-off if the mineral properties are sold or abandoned. General exploration expenditures are expensed as incurred.

The amounts shown for mineral properties represent costs to date, and do not necessarily represent future values as they are entirely dependent upon the economic recovery of current and future reserves.

The Company reviews capitalized costs on its mineral properties on a periodic basis and will recognize impairment in value based upon current exploration or production results, if any, and upon management's assessment of the future probability of profitable revenues from the property or from sale of the property. Management's assessment of the property's estimated current fair market value is also based upon management's review of other property transactions that have occurred in the same geographic area as its properties.

The Company does not accrue the estimated future costs of maintaining its mineral properties in good standing.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost and amortization is calculated on a declining balance basis at the following annual rates: furniture and equipment – 20%; computer equipment – 30%; and vehicles – 30%. Property, plant and equipment acquired in a fiscal year is amortized at one-half of the annual rate.

Cash and Cash Equivalents

Cash and cash equivalents in the statement of financial position comprise of cash at banks and on hand, and short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash. The company's cash and cash equivalents are invested with major financial institutions in business accounts and term deposits which are available on demand by the Company for its exploration programs and administrative expenses, and are not invested in any asset backed securities.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

2. Significant Accounting Policies – (cont'd)

Share Capital

Equity instruments are contracts that give a residual interest in the net assets of the Company. Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, share subscriptions and warrants denominated in the functional currency are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Common shares issued for non-monetary consideration are recorded at their fair market value based upon the trading price of the Company's common shares on the TSXV on the date of share issuance.

Stock-based Payment Transactions

Where equity-settled share options are awarded to employees, the fair value of the options at the date of grant is charged to the statement of comprehensive loss over the vesting period. Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each reporting date so that, ultimately, the cumulative amount recognized over the vesting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to the statement of comprehensive loss over the remaining vesting period.

Where equity instruments are granted to employees, they are recorded at the fair value of the equity instrument granted at the grant date. The grant date fair value is recognized in comprehensive loss over the vesting period, described as the period during which all the vesting conditions are to be satisfied.

Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in the statement of comprehensive loss, unless they are related to the issuance of shares. Amounts related to the issuance of shares are recorded as a reduction of share capital.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations.

All equity-settled share-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital, adjusted for any consideration paid.

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense

2. Significant Accounting Policies – (cont'd)

Loss per share

Basic loss per common share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. Diluted income per share reflects the potential dilution that could occur if potentially dilutive securities were exercised or converted to common stock. Fully diluted amounts are not presented when the effect of the computations are anti-dilutive due to the losses incurred.

Income taxes

The Company accounts for and measures future tax assets and liabilities in accordance with the liability method under which future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be settled. When the future realization of income tax assets does not meet the test of being more likely than not to occur, a valuation allowance in the amount of the potential future benefit is taken and no net asset is recognized. The Company has taken a valuation allowance for the full amount of all potential tax assets.

Current income tax, if any, is the expected amount payable or receivable on the taxable income or loss for the period, calculated in accordance with applicable taxation laws and regulations, using income tax rates enacted or substantively enacted at the end of the reporting period, and any adjustments to amounts payable or receivable relating to previous years.

Deferred income taxes are provided using the liability method based on temporary differences arising between the income tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined using income tax rates and income tax laws and regulations that have been enacted or substantively enacted at the end of the reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized to the extent that it is probable that future taxable income will be available against which the losses or temporary differences can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, the deferred tax asset is reduced.

Asset Retirement Obligation

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of a mineral property interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, as soon as the obligation to incur such costs arises. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight line method. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount or timing of the underlying cash flows needed to settle the obligation. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and charged against profits as extraction progresses.

For the Nine Months Ended June 30, 2012 and 2011

2. Significant Accounting Policies – (cont'd)

Asset Retirement Obligation – (cont'd)

The Company has no material restoration, rehabilitation and environmental costs as the disturbance to date is minimal.

Certain pronouncements were issued by the IASB or the IFRS Interpretations Committee that are mandatory for accounting years beginning after October 1, 2011 or later years. The following standards and interpretations have been issued but are not yet effective:

- IFRS 9 Financial Instruments
- IFRS 9 Financial Instruments is part of the IASB's wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015. Management is in the process of evaluating the impact of the new standard on the Company.
- IFRS 10 Consolidated Financial Statements
IFRS 10 builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard provides additional guidance to assist in the determination of control where this is difficult to assess. The Company is yet to assess the full impact of IFRS 10 and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.
- IFRS 11 Joint Arrangements
IFRS 11 describes the accounting for arrangements in which there is joint control; proportionate consolidation is not permitted for joint ventures (as newly defined). IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC 13 Jointly Controlled Entities — Non-Monetary Contributions by Venturers. The Company is yet to assess the full impact of IFRS 11 and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.
- IFRS 12 Disclosures of Interests in Other Entities
IFRS 12 includes the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and other off balance sheet vehicles. The Company is yet to assess the full impact of IFRS 12 and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.
- IFRS 13 Fair Value Measurement
IFRS 13 aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements, which are largely aligned between IFRSs and US GAAP, do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRSs or US GAAP. The Company is yet to assess the full impact of IFRS 13 and intends to adopt the standard no later than the accounting period beginning on January 1, 2013.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

2. Significant Accounting Policies – (cont'd)

Asset Retirement Obligation – (cont'd)

- IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine

In IFRIC 20, the IFRS Interpretations Committee sets out principles for the recognition of production stripping costs in the balance sheet. The interpretation recognizes that some production stripping in surface mining activity will benefit production in future periods and sets out criteria for capitalizing such costs. While the Company is not yet in the production phase, the Company is currently assessing the future impact of this interpretation yet effective that would be expected to have a material impact on the Company.

Critical Accounting Estimates and Judgments

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the period of the change, if the change affects that period only; or in the period of the change and future periods, if the change affects both.

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statements within the next financial year are discussed below:

- Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the profit or loss in the period the new information becomes available.

- Title to Mineral Properties

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

- Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

Colombia Crest Gold Corp.

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

2. Significant Accounting Policies – (cont'd)**Critical Accounting Estimates and Judgments – (cont'd)**

• Income Taxes – (cont'd)

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

• Rehabilitation Provisions

Rehabilitation provisions have been determined to be \$Nil based on the Company's internal estimates. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from period to period.

3. Cash and cash equivalents

The components of cash and cash equivalents are as follows:

| | June 30, 2012 | September 30, 2011 | October 1, 2010 |

Bolivia:

San Simon and Dona Amelia

Pursuant to an agreement (the "San Simon Agreement") executed in fiscal 1999 and subsequently amended, the Company owns the right to acquire 100% of all production from 11 mineral concessions. These 11 mineral concessions are subject to a 3% net smelter returns royalty, of which the Company can purchase 1% for US\$500,000 and a second 1% for US\$750,000.

In April, 2003, pursuant to an agreement with San Simon Resources Ltd. ("SSR") the Company acquired from SSR an 80% interest in production from 7 non-core mineral concessions and the right to acquire one additional mineral concession (known as the California concession). The Company also entered into a separate agreement in June, 2003 with the underlying owner of the California concession whereby it obtained a 100% interest in this concession.

These concessions are subject to a 3% net smelter returns royalty, of which the Company can purchase 1% for US\$500,000 and a second 1% for US\$1,000,000.

For the Nine Months Ended June 30, 2012 and 2011

7. Exploration and Evaluation Assets – (cont'd)

Colombia: - (cont'd)

Fredonia - (cont'd)

- (i) Each warrant exercisable to purchase an additional common share at \$0.40 per share expiring September 28, 2012.
- (ii) Reimbursement to optioner for taxes paid. By agreement with both parties, time for payment was extended to January, 2011 (paid).
- (iii) By an amendment agreement dated August 16, 2011, time stipulated was extended for six months.

In the event that any of the above-noted expenditures are not made within the timeframe specified above, the Company will be required to pay the portion of expenditures unspent directly to the optionor in cash.

By June 27, 2014 (extended by six months by an amendment agreement dated August 16, 2011) the Company must deliver to the optionor written notice (the "Study Notification") of the Company's intention to fund the preparation of a feasibility study, which must be completed by June 27, 2019 (extended by six months by an amendment agreement dated August 16, 2011). In order to maintain its right to earn a 75% interest, the optionor must incur a minimum in exploration expenses of US\$250,000 during each one year period after the Study Notification until the earlier of: (i) completion of the Feasibility Study; or (ii) the end of such five year period.

In the event the Company does not meet this expenditure requirement in any such one year period, the Company may maintain its right to earn a 75% interest by issuing common shares to the Optioner with a value equivalent to the difference between the amount spent during that year and the US\$250,000 minimum, provided that such common shares shall be valued at the closing price on the TSXV on the last trading day before the applicable anniversary of the Study Notification date.

After completion of a detailed feasibility study (National Instrument 43-101 compliant), each party will be required to fund its pro-rata share of development costs. During the duration of the agreement, the Company will be responsible for all expenditures related to concession maintenance, including canon payments and insurance policies.

Upon acquisition of a 75% interest in the Fredonia Property, the parties will form a 75/25 joint venture and funding of further exploration and development of the project will be based on the parties' percentage interest. If the optionor chooses not to contribute to funding such work its interest will be diluted, based on an industry standard dilution formulae, to a minimum 2.5% net smelter royalty.

7. Exploration and Evaluation Assets – (cont'd)

Colombia: - (cont'd)

Venecia

Pursuant to an agreement dated March 30, 2011, the Company has an option to acquire up to a 75% interest in the mineral title of the 1,985 hectare Venecia Property located in Antioquia, Colombia, as follows:

| Date | Expenditures US\$ | Common Shares / Warrants Issued | Cash US\$ | Interest Earned |
|--|-----------------------|--|------------------|--------------------|
| Upon signature of the LOI (September 30, 2010 - paid) | - | | 30,000 (i) | - |
| By April 14, 2011 | 50,000 (incurred) | - | - | - |
| By April 21, 2011 | | 250,000 shares and 250,000 warrants (ii) (issued) | - | 12.5% |
| By March 30, 2012 | 950,000 (incurred) | 125,000 shares and 125,000 warrants (ii) (issued) | 80,000 (paid) | 25.0% |
| By March 30, 2013 | 1,000,000 | 125,000 shares and 125,000 warrants (iii) | 75,000 | 37.5% |
| By March 30, 2014 | 1,000,000 | 125,000 shares and 125,000 warrants (iii) | 375,000 | 75.0% |
| Total | <u>2,832,500</u> | | <u>535,000</u> | <u>75.0%</u> |

- (i) By agreement with both parties, time for payment was extended to December 20, 2011 (paid).
- (ii) Warrants have an unit exercise price of \$0.4375 with 250,000 expiring April 15, 2013 and 125,000 expiring March 23, 2014.
- (iii) Each warrant will have an exercise price equal to the greater of the closing price of the Company's common shares at the date of execution or \$0.4375. The warrants will have an expiry date of two years after their date of issue.

In the event that any of the above-noted expenditures are not made within the timeframe specified above, the Company will be required to pay the portion of expenditures unspent directly to the optionor in cash.

Upon acquisition of a 75% interest in the Venecia Project, the parties intend to form a 75/25 joint venture and funding of further exploration and development of the project will be based on the parties' percentage interest. Or, the optionor can choose to sell its interest in the project at its fair market value or have the Company fund the optionor's share of expenses, in which event, the Company will receive 100% of proceeds from production until it has been repaid such funds plus interest at the US prime rate plus 5%.

| Balance - June 30, 2012 | 85,649,956 | 79,783,706 |

During the nine months ended June 30, 2012, the Company issued common shares pursuant to a non-brokered private placement of 12,000,000 units at a price of \$0.285 per unit for gross proceeds of \$3,420,000. Each unit was comprised of one common share and one-half of a share purchase warrant. Each full warrant is exercisable to purchase one additional common share for \$0.35 expiring October 31, 2013.

All proceeds from the above private placement were allocated to share capital with none allocated to warrants.

125,000 common shares fair valued at \$26,250 (based on the closing trading price of the Company's common shares at the time of issuance) were issued in accordance to the Venecia option agreement.

For the Nine Months Ended June 30, 2012 and 2011

9. Share Capital – (cont'd)**c) Stock options:**

The Company has a stock option plan whereby, the maximum number of common shares reserved for issue under the plan shall not exceed 10% of the outstanding common shares, as at the date of the grant. The maximum number of common shares reserved for issue to any one person under the plan cannot exceed 5% of the issued and outstanding number of common shares at the date of the grant and the maximum number of common shares reserved for issue to a consultant or a person engaged in investor relations activities cannot exceed 2% of the issued and outstanding number of common shares at the date of the grant. Options vest at the date of grant, unless otherwise noted.

The exercise price of each option granted under the plan may not be less than the Discounted Market Price (as that term is defined in the policies of the TSXV). Options may be granted for a maximum term of five years from the date of the grant, are non-transferable and expire within 90 days of termination of employment or holding office as director or officer of the Company and, in the case of death, expire within one year thereafter. Upon death, the options may be exercised by legal representation or designated beneficiaries of the holder of the option.

The continuity of share purchase options is as follows:

| | Number of Options | Weighted Average Exercise Price \$ |
|------------------------------|----------------------|--|
| Balance - October 1, 2010 | 2,400,000 | 1.36 |

| Balance - at October 1, 2010, September 30, 2011 and June 30, 2012 | 4,481,900 | 1.00 | August 13, 2012 |

Warrants denominated in a foreign currency different from the functional currency of the Company meet the definition of a financial liability and accordingly are presented as such on the Company's consolidated statements of financial position and are fair valued at each period using the binomial option valuation model. At June 30, 2012 the financial liability was estimated using the binomial option valuation model with the following assumptions: risk-free interest rate - 1.15%; expected stock price volatility - 105.25%; expected life - 0.62 year; and expected dividend yield - nil.

As at June 30, 2012, the weighted average remaining contractual life of US\$ denominated warrants is 0.12 year (2011: 1.12 years)

11. Income Taxes

No income tax expense or recovery arises due to the losses incurred in the period. As at September 30, 2011, the Company had estimated non-capital losses of \$ 11,244,000, expiring between 2014 - 2030. The potential benefits of these carry-forward losses has not been recognized in these unaudited condensed interim consolidated financial statements as it is not considered probable that sufficient future taxable profit will allow the deferred tax asset to be recovered.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

12. First Time Adoption of International Financial Reporting Standards (“IFRS”)

The Company’s consolidated financial statements for the year ended September 30, 2012 will be the first annual financial statements that will be prepared in accordance with IFRS. IFRS 1, First Time Adoption of International Financial Reporting Standards, requires that comparative financial information be provided. As a result, the first date at which the Company has applied IFRS was October 1, 2010 (the “Transition Date”). IFRS 1 requires first-time adopters to retrospectively apply all effective IFRS standards as of the reporting date, which for the Company will be September 30, 2012. However, it also provides for certain optional exemptions and certain mandatory exceptions for first time IFRS adoption. Prior to transition to IFRS, the Company prepared its financial statements in accordance with pre-changeover Canadian GAAP.

In preparing the Company’s opening IFRS financial statements, the Company has adjusted amounts reported previously in the financial statements prepared in accordance with pre-changeover Canadian GAAP.

The accounting policies in Note 2 have been applied in preparing the unaudited condensed interim consolidated financial statements for the nine months ended June 30, 2012, the comparative information for the nine months ended June 30, 2011, the financial statements for the year ended September 30, 2011 and the preparation of an opening IFRS statement of financial position on the Transition Date, October 1, 2010.

The guidance for the first time adoption of IFRS is set in IFRS 1. IFRS 1 provides for certain mandatory exceptions and optional exemptions for the first time adopters of IFRS. The Company has elected to take the following optional IFRS 1 exemptions.

IFRS 3 - Business combinations

Upon transition to IFRS, a company must adjust its accounting for business combinations carried out prior to transition to comply with IFRS. IFRS 1 provides an exemption which allows companies to carry forward their Canadian GAAP accounting for business combinations prior to transition date. The Company has utilized this exemption.

IAS 21 - Cumulative translation differences

The Company has elected to take the IFRS 1 exemption to deem cumulative translation adjustments arising on consolidation of foreign operations to be zero at the date of transition to IFRS.

IFRS 2- Share based payments

IFRS 1 permits the application of IFRS 2 Share Based Payments only to equity instruments that had not vested by the date of transition to IFRS. The Company has applied this exemption and will only apply IFRS 2 for equity instruments that had not vested by October 1, 2010.

IAS 32 - Compound Financial Instruments

The Company has elected not to retrospectively separate the liability and equity components of compound instruments for which the liability component is no longer outstanding at the date of transition to IFRS.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

12. First Time Adoption of International Financial Reporting Standards (“IFRS”) – (cont’d)

IFRIC 1 - Changes in Existing Decommissioning, Restoration and Similar Liabilities

The Company has elected to apply the exemption from full retrospective application of decommissioning provisions as allowed under IFRS 1 and assessed the required provision at October 1, 2010.

IAS 23 - Borrowing Costs

The Company has elected to apply the transitional provisions of IAS 23 Borrowing Costs which permits prospective capitalization of borrowing costs on qualifying assets from the Transition Date.

The Company has applied the following mandatory IFRS 1 exemptions:

Derecognition of Financial Assets and Liabilities

The Company has applied the derecognition requirements in IAS 39 Financial Instruments: Recognition and Measurement prospectively from the Transition Date. As a result any non-derivative financial assets or non-derivative financial liabilities derecognized prior to the Transition Date in accordance with pre-changeover Canadian GAAP have not been reviewed for compliance with IAS 39.

Estimates

The estimates previously made by the Company under pre-changeover Canadian GAAP were not revised for the application of IFRS except where necessary to reflect any difference in accounting policy or where there was objective evidence that those estimates were in error. As a result the Company has not used hindsight to revise estimates.

Reconciliation to previously reported financial statements

A reconciliation of the above noted changes is included in the following balance sheets, statements of comprehensive profit and loss and statements of cash flows of the dates noted below.

Colombia Crest Gold Corp.

Colombia Crest Gold Corp.

Notes to the Condensed interim Consolidated Financial Statements

(Expressed in Canadian Dollars – Unaudited)

For the Nine Months Ended June 30, 2012 and 2011

12. First Time Adoption of International Financial Reporting Standards (“IFRS”) – (cont’d)

Notes to Reconciliations:

a) Share-based Payments

IFRS 2 is effective for the Company as at October 1, 2010 and is applicable to:

- New grants of stock-based payments subsequent to October 1, 2010;
- Equity-settled stock-based compensation awards granted subsequent to November 7, 2002 and that vest after October 1, 2010; and
- Awards that are modified on or after October 1, 2010, even if the original grant of the award was not accounted for in accordance with IFRS 2.

Pre-changeover Canadian GAAP allows the Company to calculate the fair value of the stock-based compensation on awards granted with graded vesting as a single award and recognize the expense from the date of grant over the vesting period on a straight-line basis. IFRS 2 requires each tranche in an award with graded vesting features to be treated as a separate grant with a different vesting date and fair value. Each grant is accounted for on that basis. The Company determines the fair value of stock options granted using the Black-Scholes option pricing model.

As there were no unvested stock options at the transition date, there was no effect on equity at October 1, 2010. However share-based payment awards granted in the year ended September 30, 2011 have been amended, with a resulting increase in the expense and contributed surplus of \$6,104 for that year.

b) IFRS 6 - Exploration for and evaluation of mineral resources

Capitalization of pre-acquisition expenditures

IFRS 6 is effective for the Company as of October 1, 2010 and is applicable to the accounting for exploration and evaluation of mineral resources. In terms of IFRS 6 and the company’s accounting policy, once the legal right to explore a property has been acquired, costs directly related to exploration and evaluation expenditures are recognized and capitalized, in addition to the acquisition costs. Pre-exploration costs are expensed in the year in which they are incurred.

As of October 1, 2010, the Company has expensed \$53,154 (June 30, 2011, \$131,646; September 30, 2011, \$184,800) of pre-exploration costs incurred prior to obtaining the acquisition rights, of which \$6,642 (June 30, 2011, \$nil; September 30, 2011, \$nil) was recorded as other deferred property charges while the remaining \$46,512 (June 30, 2011, \$131,646; September 30, 2011, \$184,800) was recorded as exploration and evaluation assets. These expenditures had previously been capitalized under Canadian GAAP.

For the Nine Months Ended June 30, 2012 and 2011

12. First Time Adoption of International Financial Reporting Standards (“IFRS”) – (cont’d)

c) Reversal of deferred tax liability

The Company capitalized certain mineral property exploration costs incurred by the parent company on behalf of its foreign entities. Under Canadian GAAP, a future income tax liability was recognized and measured in accordance with CICA section 3465 Income Taxes, with a corresponding increase to the carrying value of mineral property assets. Under IAS 12 Income Taxes, this deferred tax liability and the related gross-up in the carrying value of exploration and evaluation assets would not be recognized, and at October 1, 2010 \$16,537,000 (June 30, 2011, \$16,537,000; September 30, 2011 \$1,649,000) has therefore been reversed.

Also, future income tax liability at October 1, 2010 has been reduced \$Nil (June 30, 2011, \$Nil; September 30, 2011, \$115,000) to account for the write-off of a mineral property previously adjusted at transition for the effect of deferred taxes, with \$Nil (June 30, 2011, \$Nil; September 30, 2011, \$115,000)

Furthermore, \$1,200,000 recovery of future income tax liability during the year ended September 30, 2010 (June 30, 2011, \$1,200,000; September 30, 2011 \$1,200,000) has been reversed against deficit.

As a result of the reversal of deferred tax liability and its impact on write-offs, the mineral property assets were adjusted at October 1, 2010 by \$Nil (June 30, 2011, \$Nil; September 30, 2011 \$20,980,798) to back out a write-off of deferred taxes already adjusted for. The write-off of mineral properties was accordingly adjusted to back out the initial amount set up of \$Nil (June 30, 2011 \$Nil; September 30, 2011 \$38,832,798) and set up the actual amount of \$Nil (June 30, 2011, \$Nil; September 30, 2011, \$27,935,204).

In addition, as a result of the transition to IFRS the carrying amounts of various assets and liabilities have been adjusted (see (a) and (b) above). There has not been a corresponding change to the tax basis of these assets and liabilities. This will not impact the deferred taxes recognized. However, this will impact the disclosure of individual temporary differences.

d) Foreign currency translation - Functional currency

The cumulative translation adjustment records the exchange difference arising on consolidation of foreign operations which is recognized in other comprehensive income or loss. Due to a change in the functional currency of the Company’s foreign operations in Bolivia and Colombia, the translation of transactions and balances relating to these foreign operations into the Company’s functional currency, as described in the accounting policy in note 2, results in different amounts for non-monetary assets compared to those under Canadian GAAP. This change has resulted in a reduction in exploration and evaluation assets as at October 1, 2010 of \$7,402,930 (June 30, 2011, \$9,740,647; September 30, 2011, \$4,225,424) of which \$7,402,930 was charged to deficit at transition to IFRS, while the difference was offset to cumulative translation adjustment (June 30, 2011, \$2,337,717; September 30, 2011, \$3,177,506).

e) Warrants – Denominated in a foreign currency

Under Canadian GAAP, both Canadian and US dollar denominated warrants were accounted for as equity instruments. IFRS requires that warrants denominated in a currency other than the functional currency of the issuer be classified as liabilities and fair valued each period unless they are part of a pro rata issue to all existing shareholders, in which case they would be classified as equity. As a result of the adoption of IFRS, the Company’s US dollar denominated warrants were therefore classified as warrant liabilities rather than equity and revalued to their fair value at each period end. Subsequent changes in the fair value of the warrants are recorded in net income. The effect of this adjustment is a reduction of \$829,622 in share capital at October 1, 2010 (June 30, 2011, \$829,622; September 30, 2011, \$829,622), an increase in warrant liability of \$966,970 at October 1, 2010 (June 30, 2011 \$232,100; September 30, 2011 \$27,560) and a corresponding increase of \$137,348 in deficit at October 1, 2010 (June 30, 2011, \$597,522 decrease; September 30, 2011, \$802,062 decrease).
