NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

In accordance with National Instrument 51-102, Eaglecrest Explorations Ltd. (the “Company”) discloses that the accompanying un-audited interim consolidated financial statements for the Six months ended, March 31, 2010, were prepared by management.

The Company’s independent auditor has not performed a review of these un-audited interim consolidated financial statements.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The interim consolidated financial statements of Eaglecrest Explorations Ltd. (a development stage company) are the responsibility of the Company's management. The interim consolidated financial statements are prepared in accordance with accounting principles generally accepted in Canada and reflect management's best estimates and judgment based on information currently available.

Management has developed and maintains a system of internal controls to ensure that the Company's assets are safeguarded, transactions are authorized and properly recorded and financial information is reliable.

The Board of Directors is responsible for ensuring management fulfills its responsibilities for financial reporting and internal control through an audit committee, which is comprised of a majority of non-management directors. The audit committee reviews the quarterly consolidated financial statements prior to their submission to the Board of Directors for approval.

EAGLECREST EXPLORATIONS LTD.
Notes to the Consolidated Financial Statements
March 31, 2010 and 2009
(Expressed in Canadian Dollars unless otherwise indicated)
(Un-audited – Prepared by Management)

Note 1 Nature of Operations and Ability to Continue as a Going Concern

The Company was incorporated under the laws of the Province of British Columbia on January 20, 1981 and its shares are listed for trading on the TSX Venture Exchange (“Exchange”).

The Company is in the development stage and is in the process of exploring and developing its resource properties in Itenez Province, Bolivia and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of amounts shown for resource properties and related deferred exploration expenditures is dependent upon the discovery of economically recoverable reserves, confirmation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development of the resource properties and upon future profitable production or proceeds from the disposition thereof.

These consolidated financial statements have been prepared in accordance with generally accepted accounting principles applicable to a going concern, which assumes that the Company will be able to meet its obligations and continue its operations for its next fiscal year. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. At March 31, 2010, the Company had not yet achieved profitable operations, has accumulated losses of \$28,253,303 (2009: \$25,232,199) since its inception, has working capital deficit of \$175,085 (2009: \$1,171,045) and expects to incur further losses in the development of its business, all of which casts substantial doubt about the Company’s ability to continue as a going concern. The Company’s ability to continue as a going concern is dependent upon its ability to generate future profitable operations and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due.

Note 2 Interim Reporting

The unaudited interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“GAAP”). Accordingly, they do not include all of the information and notes to the consolidated financial statements required by Canadian GAAP for annual consolidated financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the six ended March 31, 2010 may not necessarily be indicative of the results that may be expected for the year ending September 30, 2010.

While the information presented in the accompanying interim consolidated financial statements is unaudited, it includes all adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the interim periods presented. These interim financial statements follow the same accounting policies and methods of their application as the Company’s September 30, 2009 audited financial statements. It is suggested that these interim consolidated financial statements be read in conjunction with the Company’s audited September 30, 2009 consolidated financial statements.

Note 3 Asset Retirement Obligations

The Company records a liability for the fair value of the statutory, contractual or legal asset retirement obligations (“ARO”) associated with the retirement and reclamation of tangible long-lived assets when the related assets are put into use, with a corresponding increase to the carrying amount of the related assets. This corresponding increase to capitalized costs is amortized to earnings on a basis consistent with depreciation, depletion, and amortization of the underlying assets. Subsequent changes in the estimated fair value of the ARO are capitalized and amortized over the remaining useful life of the underlying asset. The ARO liabilities are carried on the consolidated balance sheet at their discounted present value and are accreted over time for the change in their present value, with this accretion charge included in depreciation, depletion and amortization.

As at March 31, 2010, the Company has recorded \$80,000 (2009: \$80,000) as an estimated asset retirement obligation.

Note 5 Other Deferred Property Charges

On December 6, 2009, the Company signed a Letter Of Intent to purchase up to a 75% interest in the mineral rights of the Fredonia area (the “Fredonia Property”), located in Antioquia, Colombia. Management is in the process of performing its due diligence and working on finalizing a definitive agreement. Meanwhile, all preliminary expenditures relating to the Fredonia Property have been deferred. In the event the transaction is not completed, all expenditures deferred will be expensed at that time.

Eaglecrest Explorations Ltd.
Notes to the Consolidated Financial Statements
March 31, 2010 and 2009
(Un-audited – Prepared by Management)

Note 5 Other Deferred Property Charges – (cont'd)

The Company can acquire a 75% interest in the Fredonia Property as follows:

Date	Expenditures (US\$)	Shares or Warrants Issuance	Cash (US\$)	Interest Earned (%)
Upon signature of Letter of Intent	\$ -	-	\$ 10,000 52,500*	-
Upon signature of Definitive Agreement (the “Signature Date”)	-	1,000,000 shares and 1,000,000 warrants**	-	-
During 6 months after the Signature Date	100,000	-	50,000	12.5%
At the end of the 12 months after the Signature Date	1,000,000	-	60,000	25.0%
During 24 months after the Signature Date	1,100,000	-	-	50.0%
During 36 months after the Signature Date	<u>600,000</u>	<u>-</u>	<u>-</u>	<u>50.0%</u>
Total	<u>\$ 2,800,000</u>		<u>\$ 120,000</u>	<u>50.0%</u>
Upon completion of a positive feasibility study				<u>75.0%</u>

* Refundable if no Definitive Agreement is reached. The Definitive Agreement must be reached no later than 90 days after the signature of letter of intent (date has subsequently been extended to July 17, 2010)

** Subject to regulatory approval each warrant will have an exercise price equal to the closing price of the Company’s common shares on the Signature Date plus a 25% premium. The warrants will have an expiry date of 2 years

In the event that any of the above-noted expenditures are not made within the timeframe specified above, the Company will be required to pay the portion of expenditures unspent directly to the optionor in cash.

At the end of thirty six months after the Signature Date, the Company must fund all additional expenditures required to reach the completion of a detailed feasibility study in respect of the Fredonia Property. After completion of a detailed feasibility study (National Instrument 43-101 compliant), each party will be required to fund its pro-rata share of development costs. During the duration of the Definitive Agreement, the Company will be responsible for all expenditures related to concession maintenance, including canon payments and insurance policies.

Note 5 Other Deferred Property Charges – (cont'd)

Upon acquisition of 75% interest in the Fredonia Property, the parties will form a 75/25 joint venture and funding of further exploration and development of the project will be based on the parties' percentage interest. If the optionor chooses not to contribute to funding such work its interest will be diluted based on an industry standard dilution formulae to a minimum 2.5% net smelter royalty.

The agreement is subject to approval by the regulatory authorities.

Note 6 Resource Properties

The Company's resource properties are located in Bolivia, South America and its interest in these resource properties is maintained pursuant to agreements with the titleholders. The Company is satisfied that evidence of title to each of its resource properties is adequate and acceptable by prevailing Bolivian standards with respect to the current stage of exploration on these properties, however, recoverability of amounts shown for resource properties are subject to confirmation of the Company's interest in the underlying resource properties.

San Simon and Dona Amelia Zones

Pursuant to a formal agreement (the San Simon Agreement) executed in fiscal 1999 and subsequently amended, the Company owns the right to acquire 100% of all production from eleven mineral concessions. Total consideration paid to acquire this right was US\$600,000.

These eleven mineral concessions are subject to a 3% net smelter returns royalty, of which the Company can purchase 1% for US\$500,000 and a second 1% for US\$750,000.

On April 15, 2003 San Simon Resources Ltd. ("SSR") and the Company entered into an agreement by which the Company acquired from SSR an 80% interest in production from seven non-core mineral concessions and the right to acquire one additional mineral concession (known as the California concession) by incurring US\$500,000 in mineral exploration expenditures over two years (incurred) and reimbursing SSR certain costs aggregating US\$10,000 (paid).

The Company also entered into a separate agreement on June 9, 2003 with the underlying owner of the California concession whereby it paid US\$48,000 and issued 200,000 common shares to obtain a 100% interest in this concession.

These concessions are subject to a 3% net smelter returns royalty, of which the Company can purchase 1% for US\$500,000 and a second 1% for US\$1,000,000.

The Company advanced US\$250,000 during the year ended September 30, 2007 as security for payment of exploration services to be provided. This amount was fully expensed during the year ended September 30, 2008.

By an agreement dated November 16, 2007, the Company had a 50 year option to acquire an additional mineral concession in the San Simon zone in Bolivia, South America for US\$25,000 (paid) and US\$25,000 within six months of delivery of samples by the optionor. The option was terminated by the Company during the year ended September 30, 2008 without payment of the 2nd US\$25,000. The initial US \$25,000 paid was recorded as a part of general exploration costs.

Note 6 Resource Properties – (cont'd)

Marco Maria Zone

Pursuant to an agreement (the Marco Maria Agreement) signed during fiscal 1999, the Company acquired the right to 100% of all production from eight mineral concessions located contiguous to the existing San Simon mineral concessions. Total consideration paid to acquire this right was US\$50,000 plus the issuances of 650,000 common shares.

These concessions are subject to a 3% net smelter royalty of which the Company can purchase 1% for US\$500,000 and a second 1% for US\$1,000,000.

Dona Angela (Campo Nuevo) Zone

Pursuant to an agreement signed March 2, 2001, the Company has acquired the right to 100% of all production from 13 concessions located to the north, east and west of the Company's existing holdings at the San Simon property. The Company had originally agreed to pay US\$95,000 (US\$20,000 paid) to the optionor prior to July 31, 2003.

Pursuant to an amending agreement signed in August, 2003, the Company has agreed to pay the optionor the remaining US\$75,000 (US\$37,500 paid) and incur annual exploration expenditures until production of US\$100,000. The optionor agreed to accept 375,000 common shares (issued by the Company) at a price of US\$0.10 for the remaining US\$37,500. The agreement also calls for annual payments until production of US\$20,000, commencing in fiscal 2005, to the optionor. In 2007, the payment was renegotiated down to US\$10,000 per annum. Payments totaling US\$70,000 have been paid to date and the next payment of US\$10,000 is due October, 2010.

These concessions are subject to a 3% net smelter royalty of which the Company can purchase 1% for US\$1,000,000 and a second 1% for US\$2,000,000.

Note 7 Convertible Debenture

In August 2007, the Company completed a non-secured convertible debenture financing in the amount of \$632,580 (US\$600,000). The term of the debenture was two years and matured on August 8, 2009 bearing an interest rate of 12% per annum. The lender had the option to convert any or all of the principal balance into conversion units at a deemed price of US\$0.165 per unit. A conversion unit consisted of one common share of the Company and one warrant. Each warrant had a term expiring on August 8, 2009 and was exercisable to purchase one common share of the Company at US\$0.165 per share, which would total 3,636,364 shares.

The Company used the fair value method and recorded \$436,662 (US\$414,172) to the liability component and \$195,918 (US\$185,828) to the equity component as determined by the Black-Scholes Option Valuation Model with the following assumptions:

	<u>Conversion Option</u>
Expected dividend yield	0%
Expected volatility	76.02%
Risk-free interest rate	4.67%
Expected term in years	2 years

Note 7 Convertible Debenture – (cont'd)

On June 25, 2009, a debt settlement agreement was reached to repay the principal amount of US\$600,000 through the issuance by the Company to the debtor 12,000,000 units at the fair value of US\$0.05 per unit (issued). Each unit consisted of one common share of the Company and one share purchase warrant exercisable at US\$0.10 per share to purchase an additional share of the Company until October 19, 2010. The 8,363,636 incremental shares were valued at \$480,156 (US\$418,182) and allocated \$461,452 (US\$401,892) to the equity component and \$18,704 (US\$16,290) to debt settlement expense. The incremental value of the warrants was calculated as \$460,000 using the Black-Scholes option valuation model with the following assumptions; risk-free interest rate 1.50%; expected dividend yield – Nil; expected stock price volatility 199% - 236%; and expected warrant life of 0.1 – 2.0 years. This amount has been included in debt settlement expense.

Also, pursuant to the debt settlement agreement, a cash payment of US\$90,038 was made to satisfy the accrued interest up to the date of the agreed settlement.

Over the term of the debenture, the liability was accreted to its face value. During the year ended September 30, 2009, total interest recorded amounted to \$138,806 (US\$130,228) (2008: \$128,580 (US\$128,068)); \$42,753 (US\$35,068) was paid as part of US\$90,038 above ((2008: \$49,135 (US\$48,000) was included in accounts payable), and \$73,051 (US\$71,370) (2008: \$79,445 (US\$80,068)) was accreted.

During the year ended September 30, 2009, as a result of the early conversion of the loan, \$1,349,388 was credited to share capital as follows: \$673,314 (US\$576,210) from the liability component of the loan; \$264,802 (US\$214,799) to contributed surplus; \$461,452 (US\$401,892) from deficit; and \$478,704 (US\$416,917) of debt settlement expense.
